ABELMed receives conditional approval for Ontario Spec 4.0

ABELMed Inc., of Burlington, Ont., announced that it recently received conditional approval for Ontario EMR Specification 4.0 from OntarioMD for ABELMed EHR-EMR/PM V12. The EMR system passed the validation execution stage after undergoing validation testing against Ontario's EMR Specification 4.0 requirements. This ABELMed version is now slated for the reference site testing stage and Funding Eligible status, expected in early 2012.

Some of the key functionalities include: Chronic Disease Management including diabetes management, Pan Canadian Primary Health Care EMR content standards support and interfaces to the Ontario Laboratories Information System (OLIS) and the Hospital Report Manager.

Arun Rele (pictured), Chairman and CEO of ABELMed Inc., said, "As a leader in the field of health care IT since 1977, ABEL has remained dedicated to providing Ontario physicians with certified, user friendly, practice enhancing health care IT solutions. This latest achievement is another important step in our ongoing commitment to deliver secure, superior quality solutions to the health care providers in our province."

Serving Ontario physicians for more than 34 years, ABELMed Inc. will continue to provide its customers with certified, funding eligible solutions of the highest quality.

ABELMed Inc., a Microsoft Gold Certified Partner, is a privately held corporation. As a self-financed, debt free company using the latest Microsoft.NET technologies, the company is well positioned to offer the best value to physicians for their EMR investments.
